

Versatility is What the New Shindaiwa M230 Multipurpose Tool Carrier is All About.

Easy Installation for A Variety of Tools.

M230

Shindaiwa is proud to announce the M230 Multipurpose Tool Carrier and power source. The M230 provides customers one machine that can be used for grass and hedge trimming and sawing. This unit is designed for landscapers and upscale homeowners who want to save on storage space while enjoying the convenient capabilities that individual tools offer. The M230 Multipurpose Tool Carrier and power source lets customers purchase the tools they need and want. It's their choice to select from three interchangeable attachments (string trimmer, pole pruner and articulated hedge trimmer).

Features and Benefits

- **The proven 230 series engine** with chrome plated cylinder and two ring piston produces 1.1 horsepower for maximum performance and long life in commercial applications.
- **Lightweight design and anti-vibration control** provide maximum operator comfort and productivity.

- **Split-boom feature with positive lock allows the operator to:**
 - quickly change from one attachment to another.
 - easily disassemble the unit for easy transport and storage.
- **Throttle interlock has been designed for safety** by assuring the operator has a firm grip before actuating the throttle.
- **The proven T230 "D" handle is mounted on the 30" long upper main shaft** for excellent control and comfort.
- **The unit will be packaged in a wedge shaped carton and shipped with the powerhead assembled to the shaft.** The only assembly required is the handle on the shaft.

Specifications

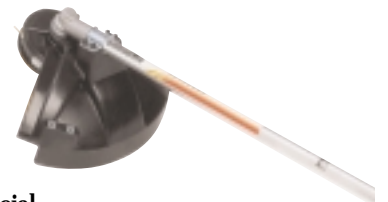

Displacement 1.4 cu in./22.5 cc

First to Start. Last to Quit.

Interchangeable Attachments

Pole pruner tool P/N 65002

- **Converts the Multipurpose tool carrier into a pole pruner**, which is designed to prune limbs while standing on the ground.
- **Operator has 110 inches of overall length.** This gives him the ability to stand firmly on the ground and reach branches.
- **Choice of three bar lengths** (8", 10" and 12").
- **Commercial grade, automatic, adjustable oiling system** self-lubricates the chain for continuous high performance cutting.
- **Cutting bar is mounted on the left-hand side** of the gearcase for excellent visibility for right handed operators.
- **Heavy-duty gearcase** for excellent durability in

commercial applications.

The only assembly required is to install the bar and chain (shipped separately) which takes only a few minutes.

Note: bar and chain are ordered separately.

Trimmer tool - Articulated hedge P/N 65003

- **Converts the M230 into a versatile commercial hedge trimmer.**
- **With a '150 degree' articulating gearcase** and 58-inch total shaft length, operators can trim and shape large bushes and tall hedges with both feet firmly planted on the ground.
- **The hedge trimmer blade can be folded down** onto the M230 main shaft to reduce the overall length of the unit for ease of transport.
- **The 22.3-inch double sided, reciprocating; 'commercial quality' blade** sculpts smoothly and cleanly for a professional look.

- **Ideal for trimming ground cover** with the combination of a long shaft and articulating blade.
- **Attachment comes fully assembled.**

Attachment Installation

To install the attachment onto the M230 Multipurpose tool carrier, you simply slide the top end of the shaft into the M230 quick install coupler. It is recommended that the M230 Multipurpose tool carrier and attachment are on a flat surface so both assemblies fit end to end to facilitate easy and quick installation.
